FROM A PARENT

“As a nurse practitioner, I appreciate your comprehensive informative reply as well as the exceptional oversight and care of the athletes. Like all we have seen and experienced at Princeton, you and the medical team are dedicated to excellence and provide “above and beyond care” of students and their parents. Truly, thank you.”

FROM A STUDENT

“I have defended my thesis and am all set to participate in the graduation. I want to thank you for all your help and kindness over the last years. I was very fortunate to be a part of your group and the sessions were definitely a major contributor in my being able to finish my PhD.”
Welcome to the 117th Annual Meeting of The Auxiliary to the Isabella McCosh Infirmary. For over a century, The Auxiliary has partnered with University Health Services to maintain high quality health care and increase awareness of health services. Our financial support and volunteer hours help make McCosh Health Center more welcoming, cheerful and effective for students, parents and staff. Our funds provide for purchases of specialized equipment and software, Web design services, professional journal subscriptions, and exceptional staff training/travel opportunities. We are as traditional as fresh flowers, hand delivered by the House Committee, and as up-to-date as providing USB ports in new bedside lamps. Concluding my second year as President, I am grateful for the steady guidance and sure advice of president emerita Karen Fuchs.

As you know, our efforts are measured both in volunteer time and dollars allocated. FY 2018 was a relatively quiet year for volunteers, although FluFest and sports physicals will never go away.

Second, in terms of dollars, the financial requests have continued to be on the large side, with a therapeutic spa tub for Athletic Medicine ($45,000) and a request for professional development funds ($40,000).

The Auxiliary Board remained resolutely committed to both the Special Needs Fund and supporting the costs of standard lab tests, ensuring that sufficient funds are held in reserve. The five year agreement for us to fund the standard lab tests from Hibben Fund income was up for review in FY 2018, but the terms of the renewal are still in process as insurance picks up more of the testing costs.

The Board stays abreast of campus health issues by hosting guest speakers from UHS and other offices at its quarterly meetings. This year we heard from the Office of the Dean of the Graduate School, the Office of Disability Services, and Counseling and Psychological Services. In April we again met at Jadwin Gym and toured Caldwell Field House to see our latest purchase for the Athletic Medicine’s facilities – a therapeutic spa tub.

Looking ahead, the outlook for FY 2019 seems a little quieter than the past two years, and I am looking forward to the conclusion of discussions on a recognition program for donors, staff, and students.
Today we welcome our newest members Pamela Klebanov and Suzanne Carroll, elected in June 2017. And deepest thanks are due to Linda Hayes who has submitted her resignation.

Finally, I want to call out the Board’s committee chairs and Secretary Els Paine; and also Janet Finnie, Director of UHS, who serves as our liaison. She cares deeply about health services at Princeton, and values the work we do to support its mission. Her quarterly reports to the board keep us informed of the activities and upcoming challenges at Health Services. Her openness to new Auxiliary initiatives, such as the Reunions Open House, was much appreciated as we consider ways to expand awareness of The Auxiliary’s mission and accomplishments.

Sincerely

Dorothy Bedford
President

FROM
THE PROVOST TO THE PHYSICIAN, GLOBAL AND COMMUNITY HEALTH

“...I understand that you worked tirelessly over the break to assist one of our students who was ill. I wanted to thank you for your willingness to put personal plans on hold in order to address the needs of this student and provide him and his parents the necessary support. Supporting our students, staff and scholars in challenging times is the sign of a strong community. Thank you for the very important work you do.”
Quality Improvement

**Accreditation:** The QI department facilitated the Accreditation Association for Ambulatory Health Care, Inc. triannual (AAAHC) survey during the spring of 2018. Once again, UHS received re-accreditation and received very positive reviews by the surveyors.

**Gallup Survey Regarding Employee Engagement:** A significant improvement on overall employee engagement scores on the Gallup survey was observed for UHS in FY 2018 (91st percentile) relative to FY 2017 (83rd percentile). There were also positive shifts across all four Gallup Employee Engagement domains (i.e., Basic Needs, Management Support, Teamwork, and Growth) in FY 2018).

**QI Maturity:** A QI Maturity scale used by UHS was implemented to help the UHS QI program assess its strategic impact within UHS. The tool specifically identifies features of an organization that may enhance or impede quality improvement efforts; and monitors the impact of initiatives to create a more favorable environment for QI. The Overall QI Growth & Maturity of UHS significantly increased from previous years (i.e., FY 2016 = 57% vs. 73% in FY 2017 vs. 80% in FY 2018) and correlates well with our completion rate of QI strategic planning activities from Slv2 (i.e., overall completion rate for the UHS Quality Goal was 73% in FY 2017 and 81% in FY 2018). This suggests that the QI measure has good construct/predictive validity, and that UHS has seen significant QI growth/maturity due to our strategic efforts this past year.

Counseling & Psychological Services —Improving the Efficiency and Effectiveness of Direct Service

**Initial Consultations:** The biggest change this year for CPS was the implementation of the Initial Consultation System. Instead of scheduling students for the first available intake (intakes last 60 minutes), CPS created 20-minute initial consultation appointments. Because these appointments were briefer, CPS could schedule many more of these for each working day, thereby increasing students’ access to services.

CPS conducted 1,460 Initial Consultations this year. Student satisfaction with the initial consultations has been high. 94% of students were satisfied or very satisfied with the counselor’s ability to protect their confidentiality; and 87% of students were satisfied or very satisfied with the outcome of the meeting.

The system has been extremely successful in reducing the wait times for initial appointments by half. This year (September 2017 to May 2018), the average wait time for an initial appointment was 5 days, and for much of the year, CPS had initial consultations available within 2 days of the contact. Almost a third of our students were able to meet with a counselor for an initial consultation within 1-2 days, and 80% of all students were able to meet with a counselor within a week of their initial contact. CPS has seen utilization at CPS increase by 20% since the launch.
Clinical Treatment Coordinator: CPS successfully developed a new Clinical Treatment Coordinator (CTC) who is tasked with assisting students in connecting to clinicians in the community for treatment outside of CPS. The CTC maintains an updated list of community providers and keeps up to date on their availability and specialty areas, tracking students of concern to ensure that they maintain consistent follow-up with their outside clinicians.

Exclusive Provider Network: UHS, CPS, and the Student Health Plan office were able to launch an Exclusive Provider Network (EPN) in September of this year. The EPN is made up of 80 community providers including psychologists, social workers, and psychiatrists in the community who have agreed to accept the Princeton Student Health Plan and only charge students a $20 co-pay for treatment. Launching the EPN has dramatically increased access to ongoing therapy for students.

Protocall: CPS contracted with ProtoCall to provide first-line telephone support to students seeking CPS and Sexual Harrassment/Assault Advising, Resources, & Education (SHARE) assistance after hours. Students can now reach a ProtoCall counselor directly by calling the main number after hours, instead of having to initiate contact through the Infirmary.

Gatekeeper Training: Gatekeeper training is an essential part of a comprehensive public health approach towards decreasing student suicides and improving mental health. CPS continued to facilitate Princeton Distress Awareness & Response (PDAR) workshops, training over 500 students, faculty and staff this year.

Special Needs Fund
The Special Needs Fund (SNF), donated by the Auxiliary to the Isabella McCosh Infirmary, is used to provide financial assistance to eligible graduate and undergraduate students who are not in a position to pay healthcare bills for needs such as dental care, ER visits, surgery, specialist visits, mental health care, eye glasses and transport to appointments. In FY2018 the fund provided a total of $32,225 helping 137 students with their health needs.

Infirmary—Improvement in Service Indicators
Last year, the entire UHS nursing and Infirmary staff completed Delivering Culturally Competent Nursing Care (2012), a self-guided continuing education workbook, in an effort to build cultural competency and learn how to apply these skills to patient care situations.

Medical Services—Pre-Visit Screenings
In FY18 a pre-visit screening (PVS) initiative was successfully implemented. Patients now receive a questionnaire after registering for preventive and comprehensive health visits. The overarching goal of the PVS initiative is to identify opportunities to intervene, using evidence based behavioral health screening questions, with students who may be at increased risk for poor health outcomes.

Sincerely

Janet Finnie, Director, University Health Services

FROM A STUDENT

“Throughout my care, the doctors and nurses and their care teams have continued to demonstrate a high standard of care beyond my expectations. I am grateful for so many of these individuals at McCosh Health Center that took care of me during this difficult illness.”
