Referral Guide for Off-Campus Psychological Services

Your Referral to Private Care

You have been provided with a referral to private care off-campus. This document will provide you with information to help you get connected to the mental health services you need. Counseling and Psychological Services (CPS) offers short-term psychological and psychiatric services. When students require ongoing, long-term or specialized treatment or if students prefer to seek treatment in the community, they are referred to an off-campus provider. Ongoing, long-term mental health care is generally considered a private health care responsibility, not a routine service provided by the University. Your student insurance or private insurance is intended to help you cover the costs of such care.

Thriving Campus

Princeton University has partnered with Thriving Campus, a company committed to improving student access to mental health care. The providers on this site have experience working with university students and were invited to join by Princeton’s CPS or by counseling center staff at other colleges or universities. You can search for providers for therapy and/or medication management in the Princeton area and also in other parts of the country if you are seeking care over the summer or while on a leave of absence. You do not need to create a login to search, and you can narrow down your search criteria using the options along the left side of the page.

Making the First Contact

Typically, you may reach a provider’s voicemail when you first call. Leave a message identifying yourself, saying who referred you, and when and how you can be reached. The provider will call you back usually within a day or so. When you make contact, in addition to setting up a time to meet, you may ask additional questions. Depending on your needs and situation, you may ask a potential provider any of the following:

1. “My concerns have to do with anxiety/depression/eating issues/alcohol issues/relationship problems, etc., and I am looking for a therapist/psychiatrist. Do you have experience working with these concerns?”

2. “What is your approach to working with these issues?”
3. “Are you working virtually? If not, where is your office located?”

4. “I have XX insurance (if you are on the Student Health Plan, see below). Are you a provider in my network, or will you be an out-of-network provider? What are your fees and payment policies?”

5. “Do you offer any discounts or other fee arrangements such as sliding scale?”

**Student Health Plan**

If you have the Princeton University Student Health Plan (SHP), you are not required to use your student insurance to pay for private care, but many students do. Remember that you are responsible for paying any fees you incur that are not paid by your insurance.

The SHP has a network of providers, most of them local to the Princeton area, called the Princeton Exclusive Provider Network (EPN). These providers are in-network with the SHP and will bill directly to the insurance plan for you. You will be responsible for paying them the copayment for each session (currently $20/session; all copays for telehealth services are waived through 7/31/21).

You also have access to Aetna’s national network of providers here: [https://www.aetnastudenthealth.com/en/school/812847/members/find-doctor.html](https://www.aetnastudenthealth.com/en/school/812847/members/find-doctor.html). The SHP also covers treatment with these providers, and you will be responsible for paying them a $10 copay per session (all copays for telehealth services are waived through 7/31/21).

If you have the Student Health Plan and have any questions about the insurance, please call Aetna Student Health directly at 877-437-6511 or visit their website at [https://www.aetnastudenthealth.com/](https://www.aetnastudenthealth.com/). You may also want to view the Student Health Plan Office’s resources, which are located at [http://www.princeton.edu/uhs/student-insurance/](http://www.princeton.edu/uhs/student-insurance/). You may also email the SHP Office directly at shpo@princeton.edu.

Please keep the following in mind when you are using the SHP:

**Deductible (the amount you are responsible for paying each year before the insurance starts paying) and Copays (your out-of-pocket costs) for Outpatient Mental Health:**

- No annual deductible if you see an in-network provider who is part of the Princeton Exclusive Provider Network (EPN). Visits to in-network EPN providers are covered at 100% after $20 copay (*note: the copay is waived for telehealth services through 7/31/21).
• The deductible is waived for “Preferred Care” providers; please visit https://www.aetnastudenthealth.com/en/school/812847/index.html to search for in-network “Preferred Care” providers. After a $10 copay per visit, Aetna pays 100% of the negotiated charge (*note: the copay is waived for telehealth services through 7/31/21).

• There is an annual $200 deductible for out-of-network “Non-Preferred Care” providers (the annual deductible is cumulative, includes both medical and mental health care). Visits are covered at 70% of the recognized charge for out-of-network providers. There is no limit on the number of visits available for coverage. (*Please note: Additional coverage for telehealth services with out-of-network providers has been available during the pandemic. Visit https://uhs.princeton.edu/student-health-plan for more details.)

Deductible and Coinsurance for Inpatient Mental Health:

• SHP pays 90% of charges for “Preferred Care” and 70% of charges for “Non-Preferred Care” for inpatient psychiatric hospitalizations, with no limit on number of days hospitalized; or 100% of charges when the annual $5,000 out-of-pocket expense provision has been satisfied.

Submitting Claims:

• With out-of-network providers, the student must submit claims directly to Aetna Student Health for reimbursement. Aetna Claim Forms are available online at https://uhs.princeton.edu/student-health-plan#claims.

Prescription Medications:

• There is a separate annual $100 deductible for prescriptions.
• If you are prescribed a medication, you will access your prescription benefits through OptumRx. For more information, please visit https://uhs.princeton.edu/student-insurance/student-health-plan/prescription-program.

Private Insurance Through a Parent/Guardian

If you are not on the SHP and have other insurance coverage, you must determine your policy’s coverage and benefits by logging into your insurance plan’s website or contacting your insurer directly. If you are on your parent’s plan, you may have to speak with your parents to gain access to your insurance. When looking into your insurance benefits, you may want to ask your insurance company the following questions:
• Do I have mental health benefits?

• What is the yearly deductible, and does it apply to mental health benefits?

• What do the benefits cover?

• How can I find an in-network provider?

• Do I have out-of-network benefits? How much does my plan cover, and how much is my responsibility?

Financial Assistance

If you need financial assistance to help pay for your deductible or for ongoing services, you may be eligible for some funding. Please visit the Campus Resource Guide Emergency Funds information found here, https://ods.princeton.edu/campus-resource-guide, for more information about possible options.

FAQs

Will my health insurance pay for off-campus care?

Health insurance, whether the SHP or another plan through your family, can often help with the cost of off-campus psychological services. The best source for information about your coverage and benefits is your particular insurance plan. If you have the Student Health Plan, please call Aetna Student Health directly at 877-437-6511 or visit their website at https://www.aetnastudenthealth.com/. You may also contact the Student Health Plan office at 609-258-3138 or visit their website at http://www.princeton.edu/uhs/student-insurance/. If you have a different health plan, you can visit that website or find the number for member services on your insurance card.

Why can’t I see a clinician/psychiatrist on campus?

CPS provides short-term care to students in part due to the volume of students served. For ongoing or specialized care or access to services not available at CPS, we refer our students into the community. Ongoing, longer term mental health care is generally considered a private health care responsibility, and your health insurance is intended to help you cover your costs. Even though some students feel that ongoing counseling on campus would be more convenient, your mental health support may need to be more specialized, extensive, or frequently available than the services provided on campus and therefore better served by off-campus providers.
**Why do some students prefer off-campus care?**

Students may prefer to go off campus rather than see a counselor at CPS for numerous reasons. For some, it can feel more private to have your own therapist off campus. For others, the possibility of a wider choice among off-campus providers is appealing. Sometimes, students get referrals to community providers from their therapists and psychiatrists at home. Some students prefer the availability of private practitioners compared with the relatively limited schedules of counselors at CPS. Finally, some services simply are not available at CPS, such as neurological services, intensive individual psychotherapy, drug detoxification/treatment, etc.

**How does CPS obtain the names of off-campus resources, and what do you know about them?**

CPS maintains a database of mental health clinicians and mental health facilities in the surrounding Princeton area, as well as those located nationally and internationally. You may access this Thriving Campus database at [https://princeton.thrivingcampus.com/](https://princeton.thrivingcampus.com/). These providers have identified themselves as individuals and facilities providing mental health services, including specialized care and treatment for a variety of disorders and special populations. Many of the providers have worked with Princeton University students and/or their dependents over the years. CPS will provide you with at least a few resource options so that you may determine which particular provider is appropriate for you and your mental health needs. You may also conduct a search on your own through the above link. Any provider with a profile on Thriving Campus has had their license verified. If you have any questions or concerns, please contact your CPS referring clinician or the Director of CPS at 609-258-3141.

**How do I obtain information about the person you have referred me to?**

You can obtain further information about providers by asking information their credentials. You can also contact the state licensing board of a specific profession to obtain verification of a person’s license and credentials from a third party. For example, if you are attempting to verify licensure information about a New Jersey licensed psychologist, you may contact the NJ Board of Psychological Examiners at 973-504-6470 or go to the website at [https://newjersey.mylicense.com/verification/](https://newjersey.mylicense.com/verification/). Other mental health care providers you may want information about may be licensed clinical social workers, licensed professional counselors, or mental health facilities. You can access most information about these individuals and institutions by searching for the specific profession and “board licensing verification” or “credentialing.” If the provider is in the state of New Jersey, you may also visit [http://www.njconsumeraffairs.gov/](http://www.njconsumeraffairs.gov/).
What if I don’t like the person you refer me to?

The right match between students and a therapist/psychiatrist can be very important in contributing to effectiveness of treatment and care. We cannot guarantee the match and quality of care students receive from private providers, and it is important for you to make a choice that works for you. Sometimes the first provider you meet is the right one for you, but at other times that is not the case. If you feel you have not found a good match, do not hesitate to contact your referring CPS clinician or the CPS Clinical Treatment Coordinator immediately, and they will help you with your next steps, including providing other referrals.

All I need is a prescription refill – why can’t I get that at University Health Services?

If you are on medication for a psychological or psychiatric condition, we believe that it is important that your medications be well supervised, even if your condition has been stable for a long time. Psychiatric providers at CPS are not full-time and mainly see students for a limited period of time with the goal of getting students started and adjusted to their medications. Following this initial period, it is recommended that students pursue ongoing long-term treatment with an off-campus psychiatrist who can provide them with more accessible and tailored care. Excellent psychiatric services are available to students in the Princeton area, and again, insurance can help with the cost as discussed above.

I’m having difficulty contacting an off-campus provider. Can someone help me?

If you have any questions, concerns, or need help in any way, please contact the CPS clinician who referred you or the CPS Clinical Treatment Coordinator, and they will be happy to help.

For additional questions about off-campus mental health care, please call Counseling and Psychological Services at 609-258-3141.
