A Fact Sheet for Students: What to Do While Self-Quarantined On-Campus

SELF-QUARANTINE

You have received guidance to self-quarantine at this time. This means remaining at home, not going to gatherings or crowded public places, limiting time outside of your home, and monitoring your health.

While self-quarantining:

- **Stay home and avoid contact with others.** If you are on campus, do not go to work, class or lab and do not participate in any campus activities for this 14-day period.
- **You may spend limited time outside for a walk,** while practicing social distancing (about 6 feet or 2 meters) from others.
- **You should not share items with others,** including dishes, drinking glasses, cups, eating utensils, towels, bedding, etc. These same rules apply if you live with others.
- **Clean all “high-touch” surfaces,** such as counters, tabletops, doorknobs, bathroom fixtures, toilets, phones, keyboards, tablets, and bedside tables daily.
- **Take your temperature and call University Health Services** (609-258-3141) if you have a temperature of 100.4 F, cough or difficulty breathing.

If you must go out:

- **Wear a nose/mouth covering when entering public areas.** New Jersey executive order requires residents to wear face coverings, which fit snugly but comfortably against the side of the face and are secured with ties or ear loops, when going into public facilities, such as stores or restaurants.
- **Wash your hands often with soap and water for at least 20 seconds,** especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing. If soap and water are not readily available, **use an alcohol-based hand sanitizer with at least 60% alcohol.**
- **Keep your distance from others** (about 6 feet or 2 meters). Do not use public transportation. Avoid shaking hands, hugging, kissing, etc.

If you develop symptoms:

If you have a **fever, cough and difficulty breathing,** seek medical attention by calling University Health Services at 609-258-3141. Call in advance, do not just show up.

HOW TO KEEP YOURSELF BUSY

Self-quarantining can feel isolating and you may find yourself worrying about or obsessing over if you become sick. Try to keep yourself and your mind busy, and stay in touch with people who can support you.

- **Call or video chat with your family and/or friends.** Sometimes listening to someone else talk about their day or having the opportunity to vent can keep us from getting caught in our own heads.

- **Watch videos.** Whether it is streaming a television show or movie on an online platform, or falling down a YouTube black hole of cute animal videos, make some time to enjoy yourself. You can even learn a new skill or language just from a video!

- **Open your window and get some fresh air.** This can help you from feeling cooped up or your room feeling “stuffy”.

- **Read.** Whether it is for pleasure or for an assignment, get to reading. It can be a great escape from reality for a while. Even better if you can take a break from screens and read a print-book. Check out the free library eBook collection ([https://library.princeton.edu/news/2013-02-28/take-your-leisure-reading-online](https://library.princeton.edu/news/2013-02-28/take-your-leisure-reading-online)).

- **Get moving.** Do some stretches, march around your room, do some “bodyweight only” exercises or jumping jacks. Anything to get your blood pumping. Take advantage of the online fitness classes offered through Campus Recreation ([https://campusrec.princeton.edu/fitness-wellness/group-fitness](https://campusrec.princeton.edu/fitness-wellness/group-fitness)). You can also take a walk outside, provided you keep a safe distance (at least 6 feet or 2 meters) from others.

- **Remember to eat and hydrate.** When we are out of our routines, we can forget to take care of our basic needs, like eating meals and staying hydrated. If you find you are forgetting, try setting a timer to remind you.

- **Listen to music or guided meditation.** If you are feeling activated, try listening to calming music or following a guided meditation (e.g., [https://uhs.princeton.edu/health-resources/stress#audioguides](https://uhs.princeton.edu/health-resources/stress#audioguides)).

- **Take a break from the news.** If reading news articles or staying up-to-date on alerts about COVID-19 is making you anxious, try taking a break from it.

- **Participate in virtual community building activities.** Regular virtual programs are advertised online ([https://winter.princeton.edu/virtualactivities](https://winter.princeton.edu/virtualactivities)) and may be a great way to combat feelings of isolation.

SUPPORT RESOURCES

Call ahead before visiting any medical provider(s).

**Counseling & Psychological Services**
609-258-3141

**University Health Services - Medical Services**
609-258-3141

*Appointments will be conducted via Telehealth (virtual meeting). The details will be arranged after you schedule your appointment.

You will receive daily check in’s from UHS nurses, offering you the opportunity to have any non-urgent needs addressed and questions answered.
